PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 3 internships and hands-on experience building production-ready web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, and TypeScript. Proven ability to architect REST APIs, implement secure JWT authentication, integrate third-party services, and deliver client-facing projects on time. Passionate about clean code, scalable architecture, and real-world impact.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, PHP

Frontend: React.js, Next.js, Tailwind CSS, React Hooks, Responsive UI Design

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Socket.io, MVC Architecture

Databases: MongoDB, MySQL

Tools & Testing: Git, GitHub, Postman, Vercel, Cloudinary, npm, VS Code

WORK EXPERIENCE

Full-Stack Developer Intern (MERN Stack) | Sparks To Ideas — Ahmedabad *Jan 2026 – Apr 2026*

- Architected and delivered BorrowBuddy, a full-featured peer-to-peer rental marketplace, as the sole developer within a 4-month internship timeline.
- Designed 15+ REST API endpoints using Node.js and Express.js with MongoDB, supporting dual user roles (Borrower/Renter) and complex booking logic.
- Implemented JWT-based authentication and session management, securing all protected routes and user data across the platform.
- Integrated 3 third-party APIs — Cloudinary (image uploads), Socket.io (real-time chat), and a date-collision booking engine — reducing scheduling conflicts to zero.
- Delivered a fully responsive frontend using Next.js and Tailwind CSS, ensuring seamless experience across all screen sizes.

Front-End Developer Intern | Tech Nishal — Ahmedabad *Jul 2025 – Aug 2025*

- Built 10+ reusable React.js UI components with clean prop interfaces, reducing code duplication by approximately 30% across the project.
- Managed complex application state using React Hooks (useState, useEffect, useContext), improving component performance and maintainability.
- Collaborated with a 3-member team to debug and optimize components, contributing to faster page load and a smoother user experience.

Web Development Intern | 24JS Infinity LLP — Ahmedabad *Jun 2022 – May 2023*

- Developed and maintained 5+ dynamic web modules using PHP and MySQL, including user login systems, admin dashboards, and form handling pipelines.
- Designed normalized relational database schemas and wrote optimized SQL queries, improving data retrieval speed for high-frequency operations.
- Ensured secure backend functionality including input validation, SQL injection prevention, and session handling across all delivered features.

PROJECTS

[BorrowBuddy](#) — *Next.js, Node.js, Express.js, MongoDB, Tailwind CSS, Socket.io* *Apr 2026*

- Built a peer-to-peer rental marketplace from scratch serving dual roles (Borrower/Renter), enabling community-based item sharing with a seamless role-switching UX.
- Engineered an automated booking engine with date-collision detection across 15+ API endpoints, eliminating double-booking conflicts entirely.
- Integrated Cloudinary for mandatory 'Proof of Condition' photo uploads, and Socket.io for real-time in-app messaging between users.

- Achieved a fully responsive UI with Tailwind CSS, ensuring consistent experience across mobile and desktop with zero layout breakage.

[WhatsApp Scheduler ↗](#) — *Node.js, Express.js, MongoDB, Socket.io, whatsapp-web.js* Feb 2026

- Developed a WhatsApp automation platform enabling authenticated users to schedule individual, group, and status messages with media attachments via QR-based login.
- Implemented timezone-aware message delivery, persistent session recovery, and auto-reconnect — achieving near-zero message delivery failures.
- Added live status updates via Socket.io and email failure alerts, providing real-time feedback and reliability monitoring for all scheduled messages.

[Tip Top Tailor — Client Website ↗](#) — *HTML5, CSS3, JavaScript, GitHub Pages* May 2026

- Designed and developed a fully responsive business website for a real tailoring shop client, delivering a professional online presence from scratch.
- Built with vanilla HTML, CSS, and JavaScript — deployed live on GitHub Pages, making it publicly accessible with zero hosting cost.
- Demonstrates ability to understand client requirements, design for non-technical users, and deliver a production-ready product independently.

CERTIFICATIONS & WORKSHOPS

- **Build Your Own Generative AI Model** — NXT Wave (Mar 2024)
- **Full-Stack Development with Node.js & MongoDB** — Tops Technologies (Dec 2023)
- **Responsive Web Design & Front-End Development** — Tops Technologies (Dec 2023)
- **Trends & Future of Full-Stack Development** — Tops Technologies (Feb 2024)
- **Entrepreneurship & Digital Innovation** — SAL Education (Apr 2025)
- **Participant, Ideathon 2024** — SAL Education

EDUCATION

Bachelor of Engineering — Computer Engineering 2023 – 2026 (*Expected*)

SAL Institute of Technology & Engineering Research | CGPA: 7.39 / 10 (Sem 7 of 8)

Diploma — Information Technology 2020 – 2023

SAL Institute of Diploma Studies | CGPA: 7.99 / 10

Secondary (Class X) — Gujarat Board 2020

Shri Durga High School
